

ACGME Case Log Reporting

For the past 4 years, your residents have been entering their case log data into the ACGME system. This is the first year that a graduating class has a complete set of data for their training years. Consequently, all core radiology programs were asked to submit final summary reports for residents completing their training during the 2009-2010 academic year.

You probably noticed the requests for these data in *e-Communication* and many of you complied with this request. If you did not meet the required deadline, you will be receiving an e-mail notice from ACGME's IT staff.

However, you can still enter the required data; instructions for submission can be found <http://www.acgme.org/residentdatacollection/documentation/20092010yearendinstructions.pdf>

A streaming tutorial, as well as detailed instructions with pictorial layout, is available at the end of the document. The process does not require much time to complete.

Please contact the Support Center at Oplog@acgme.org with questions.
